

Disposal and Capacity 2005 Solid Waste Report

During Fiscal Year 2005 the amount of waste sent to Georgia landfills increased only slightly as per-capita waste disposal rates remained stable. Georgia has approximately 28 years of remaining permitted MSW landfill space and 17.2 years of remaining permitted C&D landfill space. Trends toward privatization of waste collection and disposal infrastructure continue statewide, with transfer stations increasingly popular as landfills become larger and demand larger volumes of waste to operate cost-effectively.

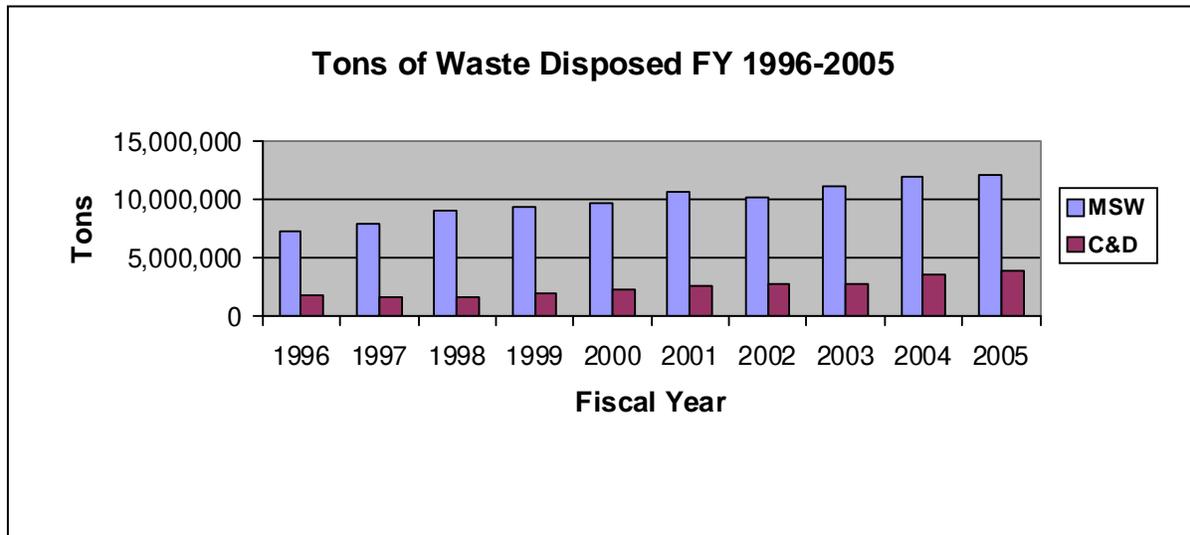

Where Does the Waste Go?

Much of the waste disposed of in Georgia enters lined, monitored MSW Landfills. Of the 16,176,296 tons of non-industrial waste disposed in permitted Georgia disposal facilities during FY 2005, 11,929,801 tons, or 74%, entered lined, monitored landfills. Approximately 3,876,697 tons, or 24%, entered unlined Construction and Demolition landfills. The remainder was divided among unlined Municipal Solid Waste landfills (225,797 tons, or 1.7%), the state's only MSW incinerator (101,688 tons; 0.7%), and the state's only large-scale MSW composting facility (54,640 tons; 0.3%).

According to the Department of Natural Resources, Environmental Protection Division (EPD), 12,155,598 tons of waste entered MSW landfills in Georgia during FY 2005. This is up slightly from FY 2004, when 11.9 million tons of waste entered Georgia MSW facilities.

Most of the waste disposed in Georgia enters private landfills. In FY 2005, landfill owners/operators reported 8,947,772 tons of waste entering 14 private MSW landfills, compared with 8,951,929 tons entering 16 private MSW landfills in FY 2004. In FY 2005, 3,209,827 tons of waste entered 53 publicly owned MSW facilities in the state, compared with 2,964,192 tons entering 54 public MSW landfills the previous year. (These figures include facilities that were active for only a portion of FY 2005.)

¹Operating as of July 1 of the indicated fiscal year, some facilities cease operations or are added, so these figures may differ from those used elsewhere in this report.

²Collection operations are any entity that collects waste from residential or commercial locations.

C&D Landfills

Construction and Demolition landfills are permitted disposal facilities that can only accept waste building materials and rubble resulting from construction, remodeling, repair, and demolition operations on pavements, houses, commercial buildings and other structures. Such wastes include, but are not limited to, yard trimmings, asbestos-containing waste, wood, bricks, metal, concrete, wall board, paper, cardboard, inert waste landfill material, and other nonputrescible wastes which have a low potential for groundwater contamination.

The public sector owns and operates a greater number of C&D facilities in the state, but it manages only 38.8% of the statewide C&D disposal capacity. In FY 2005, landfill operators reported 3,187,687 tons of waste entering 17 private C&D facilities, while 694,295 tons of waste entered 40 publicly owned facilities. These figures include facilities that were active for only a portion of FY 2005, and those that are under construction.

Unlined Landfills

During FY 2005, 225,797 tons of waste was disposed in five unlined MSW landfills. This represents approximately 1.7% of the total waste entering MSW landfills in Georgia. As of July 2005, five unlined MSW facilities were still operating under their original EPD-approved permits, and had not reached their closure capacity. Until they do, they must adhere to the same operating procedures and methane monitoring requirements as their more modern counterparts. When the unlined facilities close, they will be capped and monitored under federal Subtitle D regulations. There is no time limit for these landfills to meet Subtitle D regulations, but they will not be granted expansion permits. It is likely that a very small percentage of MSW generated in Georgia will continue to be disposed in unlined landfills for years to come.

Unlined Landfills Accepting MSW FY 2005

County	Facility Name	Total Tons Disposed	Avg. Daily Tons	Remaining Capacity (CY)	Remaining Capacity (Years)

Disposal and Capacity 2005 Solid Waste Report

Other Disposal Facilities

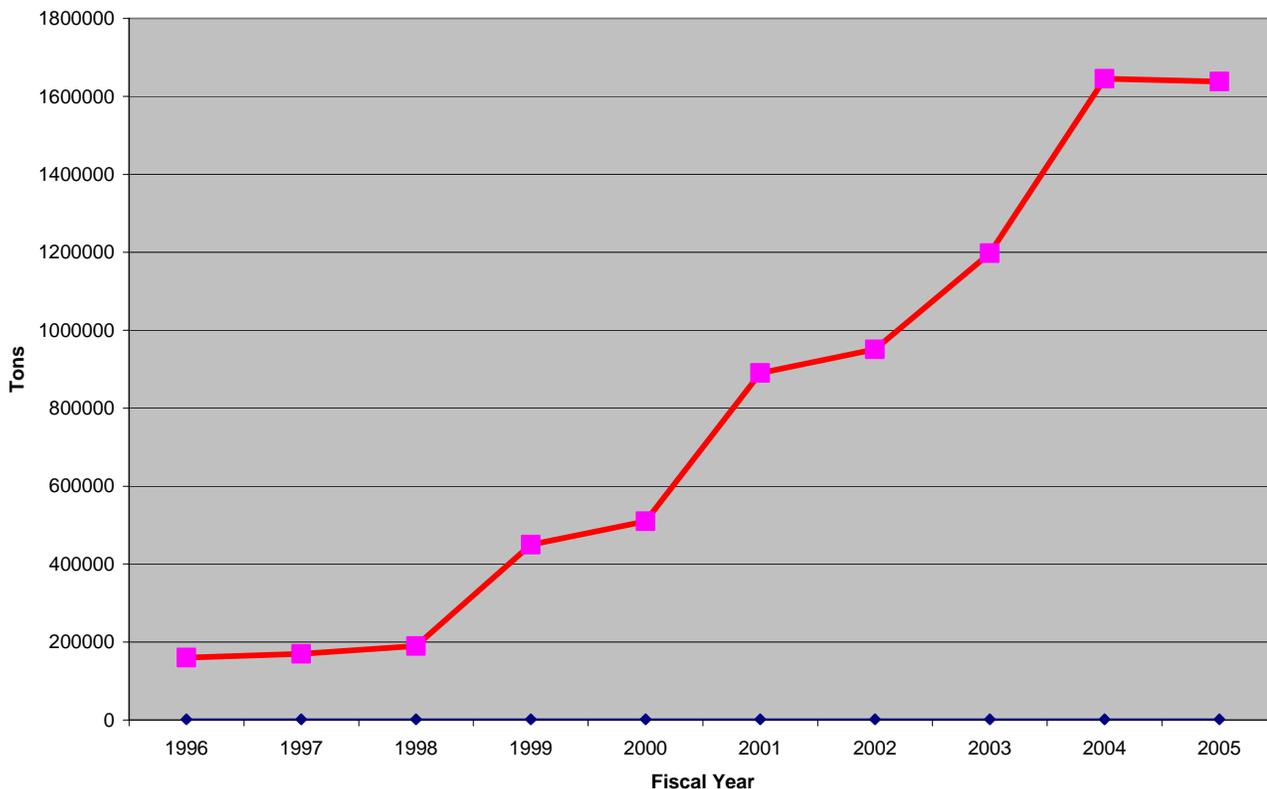

There is one incinerator operating in Georgia accepting MSW. Located in Chatham County, the operation is also known as a waste-to-energy facility. The facility accepts approximately 384 tons per day, mostly from the City of Savannah. During FY 2005, 101,688 tons of waste was incinerated at this facility. There are several other types of incinerators in public and private use that accept only specialized waste, such as wood waste.

Another unique waste disposal operation in Georgia is Cobb County's MSW composting facility. The facility accepts approximately 186 tons per day of MSW collected in Cobb County. The composting process results in a clean, beneficial soil amendment given to Cobb residents free of charge. During FY 2005, 54,640 tons of MSW entered the Cobb Composting facility.

Imported Waste

The amount of waste brought to Georgia from other states and disposed has increased dramatically in the last decade. Waste imports fell slightly from 1,646,164 tons in FY 2004, to 1,638,292 tons in FY 2005. Most of the waste brought to Georgia from other states is MSW (95%), with the remainder being Construction and Demolition waste. Out-of-state waste amounts to 10.1% of the total amount of MSW disposed in Georgia, or 14.5% of the waste entering MSW landfills in the state. (See Waste Imports FY 1994-2005) As shown in the table on page A-4, most of the imported waste enters a small number of facilities. It is difficult to track waste exported from Georgia, and it is suspected that in most cases, it travels relatively short distances across state lines. Based on telephone interviews with operators of transfer stations that ship waste out of state, it is believed that approximately 150,000 tons per year of Georgia-generated waste is sent to neighboring states.

Remaining Landfill Disposal Capacity

On a statewide basis, Georgia continues to have an adequate supply of permitted landfill disposal capacity, however some regions of the state are running low. At the close of FY 2005 the state had 28 years of remaining permitted MSW landfill space and 17.2 years of permitted C&D landfill space. The projection of remaining capacity is based upon current disposal rates and disposal capacity permitted by the Georgia EPD, but not necessarily built landfill space. The maps on page A - 5 highlight the change in the amount of permitted MSW landfill capacity in the state from 2004.

Landfill Capacity by Type FY 1996-2005

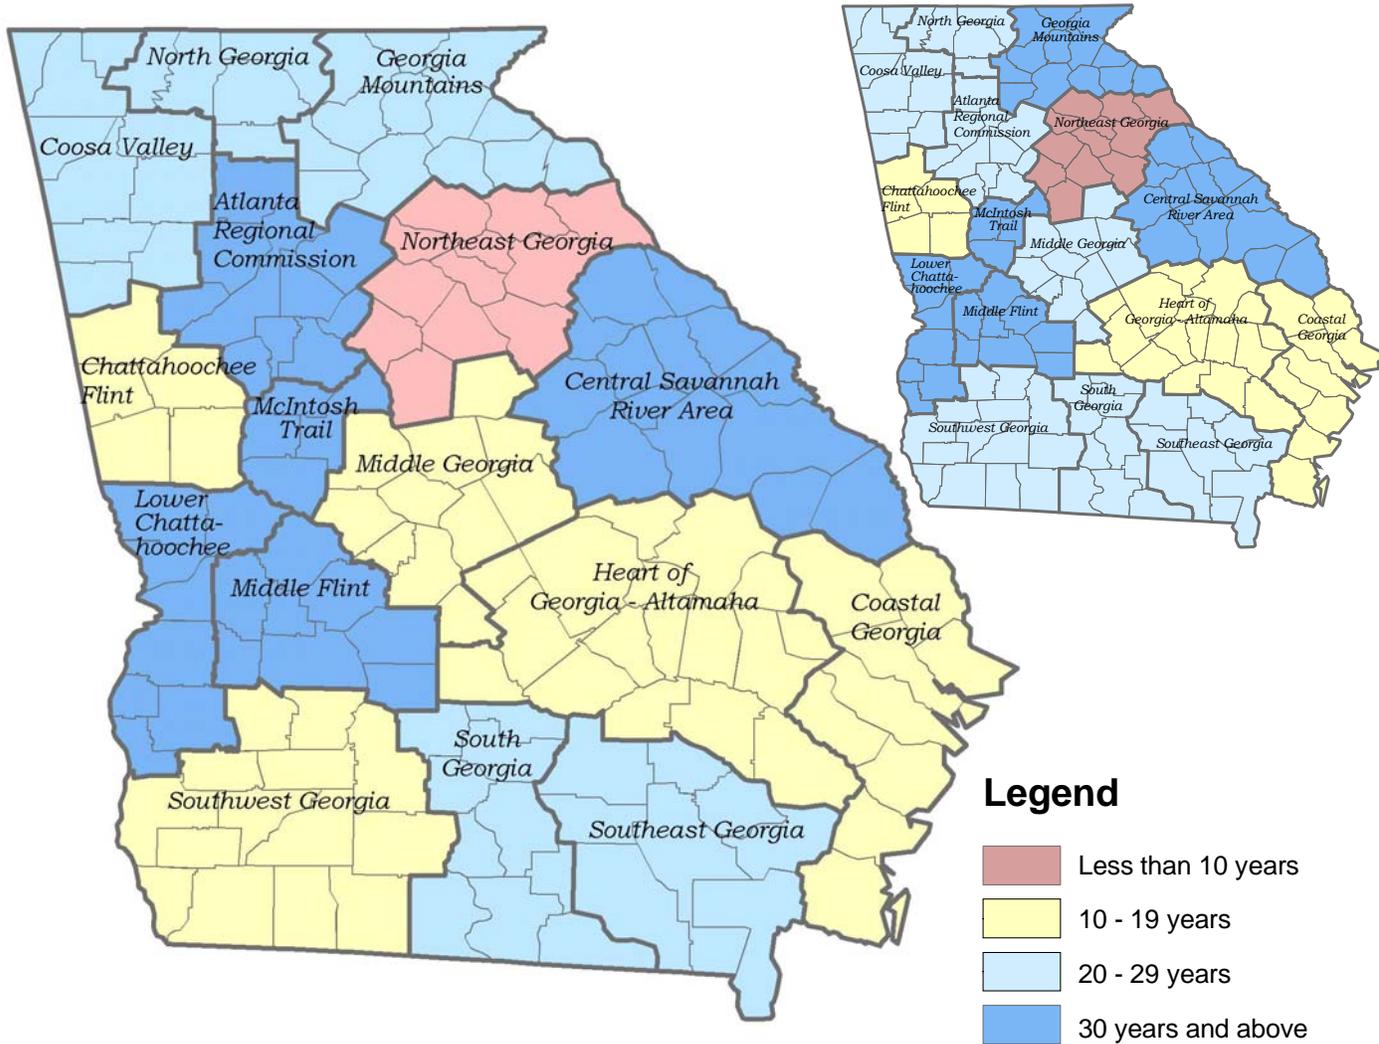

Remaining MSW Landfill Capacity

FY 2005

FY 2004

Map prepared by: Georgia Department of Community Affairs. Source: Years of remaining capacity by Regional Development Center was calculated using EPD-supplied average rate of fill and cubic yards of remaining capacity, based on 260 operating days per year.

Disposal and Capacity 2005 Solid Waste Report

Permitted capacity, or the amount of available space in landfills to dispose of tightly compacted waste, grew from 430 million cubic yards in FY 2004 to 470 million cubic yards in FY 2005. Georgia has an estimated 28 years of remaining permitted MSW landfill capacity statewide, based upon 2005 disposal rates. A regional breakdown, by Regional Development Center and landfill type, can be found on page 8. The projection of remaining capacity is based upon current disposal rates and disposal capacity permitted by the Georgia EPD, but not necessarily built landfill space.

While the state has more disposal capacity today than it had in the past decade, this capacity is contained in fewer landfills. The number of MSW landfills in Georgia has fallen since tighter federal regulations were adopted in the mid-1990s, but the number of C&D landfills has increased to 57 in FY 2005. In FY 1993, there were 187 public and private landfills in Georgia, and 75% of these were small facilities that only accepted waste generated within the host county. For FY 2005, approximately 60% of the state's total remaining capacity sits in just seven facilities, although there are 126 active permitted landfills in Georgia. These gains in remaining disposal capacity have occurred while smaller or older landfills are closed and enter lengthy post-closure monitoring periods. The table entitled 'Georgia Landfills with Most Remaining Permitted Disposal Capacity FY 2005' on page 7 ranks the top ten landfills in the state by remaining permitted disposal capacity.
